

LB01F Visual, LB01F FDX-B, LB01F HDX Leg Band for Sheep & Goats

Product Description

The leg band is suitable for the identification of sheep and goats. It can be easily applied around the animal's leg, its closing mechanism is tamperproof and the leg band diameter is adaptable to the size of the leg. When the animal grows, the leg band can be enlarged without opening its tamperproof mechanism.

The leg band is made from a very flexible polyurethane and tag numbers are laser marked as per customer indication with a black durable contrast.

The product is available in electronic (FDX-B or HDX) and visual versions.

Technical Specifications

Dimension (W x L)	40 x 163 mm
Weight	16.0 g
Material	Polyurethane
Technology	FDX-B or HDX
Working Frequency	134.2 kHz
Certifications	ISO 11784/5 (FDX-B: 964019, HDX: 964022)
Typical Reading Distance (FDX-B / HDX)	27 cm / 30 cm with Tru-Test XRS2 EID Stick Reader 62 cm / 69 cm with Tru-Test XRP2 EID Panel Reader and Small Antenna
